

Presentation Instructions and Sign-Up Sheet

Presentation: Each student will be required to give a short, 10-minute presentation on a topic of his or her choosing related to physics. Presentations will be given at the beginning of class on the last day of class for the week, either Thursday or Friday. Students must have Mrs. Whittaker's approval of their topic one week before the presentation.

Below, students may sign up for a time to present. Those who sign up earlier will be graded with more leniency than those who sign up later. You can use PowerPoint, Prezi, posters, diagrams, experiments, the document camera, etc.... Make sure that you are our primary teacher and any other materials are supplemental. Any movie clips or Youtube videos must be viewed and approved by Mrs. Whittaker at least one day prior to the presentation.
